	Examiner Bob Chevalier	Art Unit 2621	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by the submitted prior art of Tomomitsu et al (JP.2002-142177).

Tomomitsu et al discloses a program data recording/reproducing apparatus that shows all the limitations recited in claims 1, and 7, including the feature of the temporary storage region being provided in the form of a ring buffer to temporarily record the program data (See the temporary store region of a ring buffer shown in Tomomitsu et al's apparatus), the feature of the long term storage region for recording the program data for a long period of time (See the long store region for long recording program data shown in the Tomomitsu et al's apparatus), and the feature of performing time shifting playback to record program data to the temporary storage region and reproduce the program data (See the capability of performing time shifting playback the program data to the temporary storage region and reproducing the record program data as shown in the recorder 103 of Tomomitsu et al), and the feature of receiving instruction to record program data for a long period of time the region management portion effecting management to alter the temporary storage region at a region containing a portion having the program data being reproduced through a portion recording the program

data into the long term storage region as specified thereof is present in Tomomitsu et al. (See the last sentence shown in Tomomitsu et al's paragraph entitled "Solution").

With regard to claims 2-6, and 8-12, the feature of altering the long term storage region into the temporary storage region by a region having a size equal to a portion of the temporary storage region as specified thereof would be inherently present in Tomomitsu et al. Because, Tomomitsu et al already disclose the capability of recording program data from the temporary store region into the long store region. (See the last sentence shown in Tomomitsu et al's paragraph entitled "Solution").

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bob Chevalier whose telephone number is 571-272-7374. The examiner can normally be reached on MM-F (9:00-6:30), second Monday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thai Tran can be reached on 571-272-7382. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
